

## Faculty Biography

---

**John L. Raisch, CHFM**  
**Engineer, Department of Engineering**  
**Standards Interpretation Group**  
**The Joint Commission**

John Raisch is an Engineer in the Standards Interpretation Group at The Joint Commission. In this role, he provides standards interpretation, reviews and processes survey reports, consults and provides educational programs for Health Care Organizations and Life Safety Code Surveyors, and serves as faculty for educational programs throughout the United States. John supports the Environment of Care, Emergency Management and Life Safety Chapters for all Accreditation Manuals for The Joint Commission.

He comes to The Joint Commission with over 25 years of healthcare experience having held managerial and director level roles in Facilities and Plant Operations Services throughout the United States. As part of his background he managed hospital expansion projects while directing 1.5 million SF facilities and merged Hospital's in the Chicagoland area.

John holds a Bachelors degree in Aeronautical and Astronautical Engineering from Purdue University and is a Certified Healthcare Facility Manager (CHFM). John is a member of American Society of Healthcare Engineering (ASHE) and Healthcare Engineers Society of Northern Illinois (HESNI). John and his family reside in the northern suburbs of Chicago.
